The FARMERS CORNER

by RALPH H. TAYLOR

Executive Secretary Agricultural Council of California

The average American farmer earned nearly two per cent on his capital investment during 1933 and topped this mark by a good margin during 1934.

And during 1935, unless all current signs fail, farm dividends—either long absent, or almost negligible—will take another step forward.

Of even greater significance, the actual purchasing power of the American farmer has virtually doubled during the last two years!

Such is the rainbow in the sky, sketched by the bureau of agricultural economics of the United States Department of Agriculture after one of the most critical and disheartening periods in the history of the farming industry.

Two per cent on capital investment—or, to be exact, 1.9 per cent, as the federal bureau reports the return for 1933—is, to be sure, a most modest dividend, especially when pitted against a long period of losses. And the 1934 earnings on farm capital, when final figures are available, will still fail to arouse the envy of the income tax authorities. But the slow, steady forge toward solvency—the transition from depression to recovery—is of tremendous importance to American agriculture and the individual farmer.

One of the most vital aspects of the reconstruction problem, insofar as agriculture is concerned, comes under the spotlight in the report of Dr. O. C. Stine of the bureau of agricultural economics, disclosing that the real purchasing power of farmers has nearly doubled in two years.

"Fortunately for the farm operator, in a period of recovery, prices of many commodities and charges for services do not advance as rapidly as prices of farm products. Consequently, income is likely to advance more rapidly than costs, and that has been the fact.

"Costs ordinarily considered as fixed have continued to decline under the pressure of a number of years of depression. Taxes on farm property have been reduced so that the amount of taxes payable upon real estate and personal farm property declined from $476,000,000 in 1932 to $380,000,000 in 1934, and interest payable upon mortgage indebtedness and bank notes declined from $596,000,000 to about $519,000,000.

"In response to the general improvement, farm wages and operating expenses increased but not so rapidly as farm income. Farm cash available for living, after the payment of interest and taxes, more than doubled between 1932 and 1933."

The gross income of California farmers for 1933—the most recent year for which compaartive tables are available—totaled $401,729,000, according to the federalanalysis, or an increase of more than $28,000,000 over the preceding 12 months.

There must be a note of caution, however, in any consideration of the present upswing in the farming industry. The farmer, for many years prior to the depression, as well as during the depression, received short prices for his products and paid excessive prices for his purchases. If, with the return of general business recovery, that condition is permitted to obtain again, the farming industry will be plunged into a new cycle of lean years. And a bankrupt agriculture, eventually, will again bring a bankrupt business and industrial world.

If permanent recovery is to be achieved, the cost of the commodities which the farmer buys—and the cost of farm services—must be held within reasonable bounds, as compared with farm income.

Joseph Keesman returned from Sonoma county this week to resume his job at the Grattan garage. Mr. and Mrs. Keesman havemoved into the Genasci house on South Second street.

Future Farmers Win and Place At Hollister Meeting

Campbell students again showed the results of the practical training received at the high school by carrying home two first places and four seconds at the Future Farmers' meet at Hollister Saturday. Seven entries were from the Campbell chapter.

C. E. York, their instructor, was in charge of the Campbell entries listed last week.

Sal Teresi, son of Peter Teresi, president of the Farmers Brotherhod, won first in farm management and record keeping; Ciro Di Salvo, first in agricultural mechanics; Lawrence Buehner, second in egg production; Frank Miyahara, second in small fruits; Don Canciamilla and Anthony Satariano, second on orchard ridger; these two also took second in home mechanics with a fully equipped blacksmith shop for the farm.

Poetry Program Enjoyed Monday By Woman's Club

Rounding out a year of remarkably fine programs, the one which was enjoyed Monday by members of the Country Woman's club was equally fine.

Mrs. Wyland R. Morgan who presided during the program hour introduced the subject of the day, "Poetry," by stating the dictionary definition, as an "expression of rhythm," and that rhythm was expressed in several forms. One of these is musical rhythm, and one of the successful exponents of that form of poetry was Mrs. Leda Gregory Jackson of San Jose.

Mrs. Jackson is vice president of San Jose Poetry club which meets regularly at her music studio on South Second street, and has recently become an active member of the Pen Women. She has composed a number of lyrics which she has set to music and has also composed music for lyrics of other authors.

She sang as her opening number a lyric of Anna Rosilla Crever, for which she had composed the music, "Time Is a Slumber Bloom." The next song, "Dream Temple," was her own work, both words and music, and the third was a poem by Henry Meade Bland, late poet laureate of California, "Sierran Pan," for which he had asked her to write a musical setting.

The delightful music and the sympathetic interpretation of the various themes, rendered by the soloist's lovely voice, were a great pleasure to her hearers. The charming personality of the singer and her explanations of the themes added much to the enjoyment of the songs.

Mrs. Eoline Knight was accompanist for Mrs. Jackson.

Mrs. Morgan read the "Foreward" written by Ruth Comfort Mitchell for Anna Rosilla Crever's book of verse, "Variant Voices," and read that little gem of verse, "To A Humming Bird,' which won a prize in the Internationals poetry contest, and which has since been set to music. Miss Crever, a resident of San Jose, is corresponding secretary of the Penwomen and leader of its poetry group, and is an officer of the Poetry club.

Mrs. Vaudine Putnam Sanders presented three of her pupils who entertained with musical readings and then exemplified the "poetry of motion," their dances being given in costume. The little maids and their numbers were Doris Buck, "It Can be Done," and a Spanish dance; Dorothy Taylor, "Old Man Conscience," and "A Trip to the Jungle," an original poem, and a Russian dance; Barbara Sproat, group of three readings, amusical reading, "Cinderella's Fella," and a tap dance.

These features added an interesting and colorful note to the program. Mrs. Bayard Rhoades played the accompaniments for all these selections.

Mrs. Lillian Rae, teacher of English and dean of girls at the Campbell union high school, gave a very enlightening account of the development and purpose of the girls' poetry club of the school. Starting

WARNING TO PRUNE GROWERS

Your nominating ballots for the Growers Committee Members should not be destroyed, but given the utmost consideration. Any ballots wrongly marked will not be counted. To protect your interests in the movement we have established headquarters at 221 Stevens Creek road and service will be rendered free of charge to enable you to mark your ballot correctly. Be sure to attend to this before May 25.

To those who mark their own ballots, Peter Teresi is recommended as Growers Committeeman, and M. C. Vennum alternate.

(Signed) Committee

Farmers' Union National Chief Picnic Speaker

E. H. Everson, president of the National Farmers' Union, will be the principal speaker at the annual picnic of the Santa Clara County Farmers' Union on Sunday at Garrod Heights, home of State President R. V. Garrod on Mt. Eden road, between Saratoga and Cupertino.

Everson is a dirt farmer from St. Charles, S. D. He has been in Washington most of the time during the present session of congress in the interest of farm relief legislation. He will have a message of interest to all farmers. Owing to his brief stay in the state this will be his only address in this locality.

A cordial invitation is extended to all who are interested in farm welfare to attend. There will be a basket lunch at noon. The county union will furnish coffee and trimmings.

The speaking will follow the luncheon.

The Drew Canning company this week installed a new large rotary cooker and cooler in its canning plant at Campbell. Other improvements and alterations are in progress in preparation for the coming season.

LaBarbara-Gray Wedding In San Francisco Friday

Friday evening at Temple Methodist church in San Francisco occurred the wedding of Josephine LaBarbara of Campbell and Louis Gray of Mountain View, the Rev. Edgar A. Lowther reading the ceremony. The bridal couple were accompanied by Mrs. Lillian Ohlen of Campbell as matron of honor, and Felix Cordrey of San Jose.

The honeymoon was spent at Carmel. They will make their home at Mt. View, where Mr. Gray is chief of police and a boosting Kiwanian.

Mrs. Gray is a past noble grand of Ada Rebekah lodge of Campbell, and an efficient operator at the Campbell telephone exchange. She will retain her position until later in the season.

ELECTED

At the recent meeting of El Paradiso council, C. C. P. T., held at Los Gatos, Mrs. C. E. Williams of Campbell was elected fifth vice president, and Mrs. E. A. Howe, also of Campbell, was chosen as recording secretary. This council includes the P. T. A.'s of Campbell, Los Gatos high and elementary, Saratoga and Sunnyvale.

Campbell Sea Scouts Take 4th Place In Regional Meet

Due to unfortunate and unavoidable conditions and circumstances, the Campbell Sea Scout ship Cutter Bear was unable to take better than fourth place in the annual meet of the crews of 57 regional ships on Lake Merritt in Oakland last week. At every other meet Campbell has come off with flying colors with the top of the list.

The largest assemblage of sea scouts ever held drew over 600 scouts and leaders. San Francisco crews won first and third places, and Oakland second.

Campbell has no apologies to make, however, for the boys have shown their stuff so well in former contests that they are always worthy rivals.

The crew of the Cutter Bear took first in the abandon boat drill, second in the four-man swim relay, and first in the 12-oar boat race defeating the crack Viking crew of San Francisco by a length.

Hard luck which disqualified the Campbell crew in the six-man rowing race and probably cost them an easy second place was just one of the "breaks."

Sailing their two boats, Betty S. and Sereis to the meet, the boys were commanded by Skipper Henry Ruthnick, First Mate Miles Standish, and Second Mate Will Halley. The crews numbered 27.

High School Board Announces Staff For Coming Year

The Campbell union high school board has elected its corps of teachers for the coming year, and the faculty members with their respective subjects are as follows:

Miss Claribel Boesch, chemistry and biology; Miss Muriel A. Carson, vocational English; Miss Eleanor J. Corbett, mechanical drawing and art; D. H. Cramer, geometry, bookkeeping and algebra; T. A. Cutting, business English and world history; Mrs. Anna C. Dart, commercal geography, typing and bookkeeping; Miss Lois Gardner, clothing, foods, English; Miss Gladys Hall, transcription and shorthand; Miss Ruby D. Howes, physical education; M. F. Hughes, general shop and agricultural mechanics; Mrs. Harriet C. Hummel, English; Thomas D. Lewis, algebra and general science; Miss Helen M. Nielsen, world history and U. S. history and civics; Ralph E. Noddin, physics and physical education; Mrs. Lillian M. Rae, English; Mrs. Alfreda Runge, nurse and hygiene; A. A. Thielke, orchestra and band; C. P. Klassen, glee club; Miss J. Elizabeth Thomas, Spanish and Latin; C. E. York, horticulture and crops and soils.

Superintendent Lloyd K. Wood was recently given a four-year contract by the board.

Mrs. Blaine Re-elected Aid Society President

At its regular meeting last week the Ladies Aid society of Campbell Methodist church re-elected Mrs. J. D. Blaine president. Other officers are Mrs. D. H. Cramer, vice president; Mrs. C. C. Byrnes, secretary, and Mrs. Rose Hanger, treasurer.

Mrs. Edwin Bowling as hostess at the parsonage was assisted by Mesdames George Swanson, F. Fellman, George Green, Marie Flores and Charles Wightman.

Mrs. Byrnes will serve as treasurer until Mrs. Hanger returns home from England.

Seniors' Variety Entertainment Is Hit of Season

A vaudeville show by the senior class of Campbell high school Friday night proved a big success, with a full and appreciative house.

The orchestra, directed by Tony Corbisiero, gave a number of popular airs and one, a composition by Miss Margaret Bowling, proved a "double," being called for a second time by the audience.

Short plays were interspersed with dialogues and accordion numbers by Donald Lagone which are always well received.

Ballroom and specialty dancing added to the interesting variety of the show.

Surprise Party for Miss Veva Nichols

Miss Veva Nichols was the guest of honor at a surprise birthday party Tuesday evening, given by her uncle, A. T. Davey, in the parlors of the M. E. church. The guests were the two choirs for which Miss Nichols is accompanist, and a few close friends.

The young people's choir met ostensibly to practice, while the others gathered in the Sunday school room, and when the honored guest was called in there, she was greeted by the sight of a huge decorated birthday cake alight with candles, which adorned the decorated buffet table. The tea table was appointed in dainty pink, with carnations forming the centerpiece.

Progressive games, music, a short program by the young people consisting of skits, magic and original poems, were the diversions of the evening. Mr. and Mrs. O. J. Nichols assisted Mr. Davey in receiving the guests.

SVEA LODGE WILL HAVE BIG PICNIC SUNDAY, MAY 26

Svea lodge No. 348 will hold a picnic at Stoney Brook park, Niles canyon, Sunday, May 26. The committee in charge has arranged a program of games and entertainment for the day and has secured an orchestra to furnish music for a dance to be held during the afternoon.

The general public is invited to the affair by the committee which consists of Albert Nelson, Arthur Nelson and [illegible] Nelson.

The Lloyd D. Park property on Dillon avenue was sold to Frank Vlasich this week through the G. E. Farley real estate office.

News Review of Current Events the World Over

President Stirs Wrath by Calling Critics of AAA "Liars"—Senate Votes NRA Only Brief and Restricted Life.

By EDWARD W. PICKARD

©, Western Newspaper Union.

FOUR thousand farmers, gathered from all parts of the country, invaded Washington and told President Roosevelt and Secretary Wallace that they were enthusiastic believers in the efficiency of the AAA program and supporters of the amendments which the administration asks congress to make in the agricultural adjustment act. Mr. Roosevelt addressed, from the south portico of the White House, what he rather naively called a "surprise party," and prefaced his remarks with the statement that "a great many of the high and mighty" have been deliberately trying to mislead many people by "lying about the kind of a farm program under which this nation is operating." He went on to deny emphatically that the government has "wastefully destroyed food in any form."

Sen. Hastings

Next day many of the visiting farmers were in the senate gallery and heard Senator Daniel O. Hastings (Rep., Del.) score the President for characterizing critics of the AAA program as liars. The senator said:

"In his radio speech of April 28, the President urged his audience to 'feel free to criticize.' He invites criticism, and then shows that he can't take it.' We who have criticized the New Deal were earlier called 'tories,' 'traitors,' 'whiners,' 'chiselers,' etc., but now we are called 'liars,' and everybody understands just what that means, and it comes with little dignity from a man who holds the high position of President of the United States.

"But I want to say that if this term is applied to all of those persons who have criticized the New Deal, we have developed the greatest crop of 'liars' within the last six months ever found in any country."

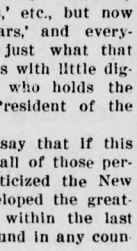
Senator Hastings then introduced a resolution calling upon the secretary of agriculture to submit all correspondence between the department and the visiting farmers, together with any instructions sent out to county agents with a view to producing the "spontaneous" visitation. Mr. Hastings also demanded to know how the delegates were selected and what financial assistance "directly or indirectly" was extended to them by the agricultural officials.

Over in the house Representative Fish of New York started a lively debate on the same topic, and he was even more outspoken than Mr. Hastings, saying:

"Confused and confounded by the marked swing away from the unsound and Socialistic New Deal policies, the President lost his head—and that is the mildest term that can be applied—when he called his critics liars."

There were plenty of defenders of the President and Secretary Wallace in both chambers. To the correspondents Mr. Wallace insisted that the gathering of farmers was spontaneous.

BY ADOPTING the resolution of Senator Bennett C. Clark of Missouri, Democrat, the senate gave the NRA life only until April 1, 1936, and considerably curtailed its powers. The expressed wishes of the President and NRA Chairman Richberg for a two year extension with enlarged powers were ignored. The changes called for in the Clark resolution provide for prohibiting inclusion of business firms engaged wholly in intrastate commerce under NRA codes or regulations; banning price fixing except in mineral resources industries, and directing the President to revise all codes within thirty days to conform to the provisions of the resolution. Majority leaders in the house were prepared to fight for the two year extension, but admitted the Clark resolution was likely to prevail there also. In that case, in the opinion of many observers, the NRA will be practically dead.



Senator Clark

While the senate was debating the matter Mr. Richberg told a massmeeting of NRA workers that the Clark resolution was "complete folly." This aroused the Missourian's wrath. He called it "the most brazen exhibition of impudence on the part of a bureaucratic official which has fallen under my observation during my lifetime," and next day in a set speech, he told his fellow senators at length just what he thought of Mr. Richberg and "his ambition to be a Mussolini in the United States.

An organization called the industry and business committee for NRA extension was called into action, as were the farmers for AAA, and its head, Ward Cheney, silk manufacturer, announced that a meeting of delegates of industries would be held in Washington May 22.

RURAL electrification administration, one of the new divisions of the works relief program, was established by President Roosevelt in an executive order, and Morris L. Cooke, a Philadelphia engineer, was appointed to be its chief. The sum of $75,000 was allotted for its administrative expenses, and allocations are to be made later for authorized individual projects.

M. L. Cooke

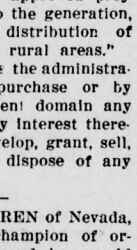
The executive order described the duties and functions of the new uni as "to initiate, formulate, administer and supervise a program of approved projects with respect to the generation, transmission and distribution of electrical energy in rural areas."

The order permits the administrator to acquire by purchase or by the power of eminent domain any real property or any interest therein and improve, develop, grant, sell, lease or otherwise dispose of any such property.

SENATOR M'CARREN of Nevada, self-appointed champion of organized labor, declared he would fight against a wage scale tentatively drafted by official of the four billion works relief program. It was reported that under this plan wage rates in the new works program would be in general about 30 per cent lower than the prevailing hourly rates for construction jobs, and Mr. McCarren said it would "tear down the wage scale of the country." The plan, it was said, had not been submitted to the President.

CONGRESSMAN MICHAEL L. IGOE of Illinois was appointed United States district attorney for Chicago and immediately confirmed by the senate—and thus Senator James Hamilton Lewis scored one on Secretary of the Interior Ickes, who had hoped for the naming of a man of his own choosing so as to strengthen his position in Chicago politics. Mr. Igoe temporarily lost his standing in the Democratic party when he sought the Illinois gubernatorial nomination which went to Judge Horner; but through the good offices of Senator Lewis he was restored and was elected congressman-at-large last fall.

DENNIS CHAVEZ, who contended that he really defeated Bronson M. Cutting in the election of a United States senator from New Mexico last year, now has Mr. Cutting's seat in the senate. Following the senator's death in an airplane crash Mr. Chavez was appointed by Gov. Clyde Tingley to fill the vacancy. He will hold office until the next general election in November, 1936, when a successor will be elected, and that is likely to be Mr. Chavez again.



Dennis Chavez

The new senator, who is the head of the Democratic party in New Mexico, was born in that state 47 years ago. While serving as a senate clerk he attended Georgetown university law school and after returning to Albuquerque to practice law he was elected to the state legislature. In 1930 he was elected New Mexico's one representative in the national house and was re-elected in 1932. He resigned in 1934 to oppose Cutting in the senatorial race and was defeated by about 1,000 votes.

EVERY one who knew anything about the matter knew long ago that the "Protocols of the Elders of Zion" were a fraud, and now a Swiss court has declared them "false and obvious plagiarism" and fined two Swiss Nazis for circulating them. The court said it was definitely established that the protocols were copied or plagiarized from Maurice Joly's "Dialogues in Hell," which appeared in 1864 and was a veiled attack on the despotism of Napoleon III. The object of the suit, brought by Jewish leaders in Switzerland, was to vindicate world Jewry by proving the falsity of the protocols which professional anti-Semites everywhere had been using to excite hostility against Jews.

PIERRE LAVAL, French foreign minister, held important conversations in Moscow with Dictator Stalin and other high Soviet officials, and the result, according to a joint communique, is that France and Russia will unite in an effort to bring Germany and Poland into a general pact of nonaggression to insure peace in eastern Europe. Both governments will open diplomatic negotiations to this end.

The communique declared that neither country will allow its "means of national defense to weaken in the slightest degree," although preservation of the peace is a primary duty of both countries.

REAR ADMIRAL RICHARD EVELYN BYRD and members of his South Polar expedition came sailing home at last on their ship Bear of Oakland and were given the warmest kind of a welcome in Washington by President Roosevelt, Secretary of the Navy Swanson, other officials and a host of their relations and personal friends. The admiral and Mrs. Byrd spent a night in the White House. Then he was joined by his mother, Mrs. Eleanor Bolling Byrd, and his four children, and the family party left for the Byrd home in Winchester, Va. The Bear of Oakland and the Jacob Ruppert, supply ship of the expedition, departed from the Washington navy yard for Boston, the admiral planning to board the Ruppert en route.

Admiral Byrd

Admiral Byrd has plenty of work ahead, with the mass of data gathered in the Antarctic, a book to be written and a lecture tour to be made, but his plans for the immediate future were uncertain. "I would like to take a little vacation," he said. "Perhaps it will be in the Maine woods, where it will be cool."

ETHIOPIA'S government renewed its demand that arbitrators be named to settle the disputes between that country and Italy, as provided in a treaty, and Great Britain and France were reported to be trying earnestly to persuade Italy to a peaceful course. Unless settlement of all differences is assured at the League of Nations council meeting May 20, or if more Italian troops are sent to the Ethiopian border, Emperor Haile Selassie will mobilize his warriors.

Foreign residents of Addis Ababa said they were ignorant of any war preparations by Ethiopia, and that there had been no troops or munitions concentrations or censorship on travel. This contradicted a story in a Rome newspaper to the effect that great quantities of munitions had been shipped into Ethiopia and were being concentrated, along with thousands of troops, near the borders of Italian Somaliland and Eritrea.

Premier Mussolini in a speech in the Italian senate, warned all other nations not to interfere in the Italo-Ethiopian quarrel, declaring that no nation but Italy "can be the judge in this most delicate matter." He denied that Great Britain and France had taken diplomatic steps to avert the threatened conflict and said these nations need not fear that Italy would be weakened in Europe by the sending of thousands of troops to Africa.

"We shall maintain under arms for all the time necessary," he declared, "the three classes of 1911, 1913 and 1914. Moreover, another class, that of 1912, is in reserve and ready."

SENATOR HUEY LONG'S resolution for an investigation of Postmaster General Farley was rejected by a vote of 62 to 20, the "Kingfish" being the only Democrat recorded in favor of it. Knowing the measure was lost, Long indulged in some characteristic language. "Go ahead and whitewash him," he shouted. "But I warn you I'll be at the next washing. You can no more make a man like him a pure man than you can make a rotten egg smell good and taste good. You are going to do this to save the Democratic party. Yes, you'll save the Democratic party. One more salvation like this and the Democratic party is through."

The senate then passed the Norris amendments to the Tennessee Valley Authority act, increasing the TVA's bonding authorization from fifty to one hundred million dollars and protecting its electric power activities from court interference.

Next on the senate program was the Wagner labor relations board bill which its author declared was "responsive to the ominous industrial disturbances of last summer when blood ran freely in the streets and martial law was in the offing."

After several amendments designed to limit the power the measure inferentially gives the American Federation of Labor had been rejected, the bill was shoved through by a vote of 63 to 12.

BY A vote of about 2 to 1 the striking workers in the Toledo Chevrolet plant decided to accept a compromise offer that had been fixed up by federal labor committeemen, A. F. of L. leaders, company officials and federal mediators. It was expected that this would result in the return to work of 35,000 men in Toledo and other motor car manufacturing centers.

CALIFORNIA
News of the Week

Californias will be asked to dig $115,300,000 out of the family wallet to support their State government during the next two years, if the Legislature and the governor agree to the revenue program formulated by the Senate-Assembly Revenue Committee. Highlights of the program include an income levy, sales tax with food exempted, inheritance levy, and taxes on hard liquor, motor vehicles, real estate transfers, bank and corporation profits and truck transportation companies. One tax reduction has been proposed: repeal of intangibles and solvent credit taxes. The income tax duplicates this.

Wheels have been set in motion by the board of directors to build the great 1938 world's fair on Yerba Buena shoals in San Francisco Bay to celebrate completion of the world's longest bridge, the San Francisco-Oakland Bay Bridge, and the world's longest suspension bridge, spanning the Golden Gate. Shallow water adjacent to Yerba Buena Island in the center of the Bay will be filled in for the fair site. After the fair, the site will become the municipal airport.

Charges of kidnaping and of threats against the American Federation of Labor representatives in Jackson, Amador County, are part of the unrest which has been created during the mine strike in the northern California town. Arthur Warren, union organizer and said to be the representative of President Edward Vandeleur of the State Federation of Labor, was driven from the mining town and warned not to return.

Herman Ziegler's stumble resulted in his death. He tripped over a small stool while working with 15 lions at Gay's Lion Farm, El Monte. No sooner had he fallen than several of the beasts pounced on him, clawing him badly. Attendants rescued him but he died two days later as a result of blood poisoning from the wounds.

E. Clampus Vitus, fun-making fraternity of the old '49er days, is still going strong. Clampers from all over the State will meet at Ophir, ghost mining town near Auburn, May 30 to June 1. The group issues the longest charters of any fraternal order. The Auburn chapter recently received its new 50-foot long charter.

Sixteen-year-old David Goldberg, Bakersfield High School student, may become one of California's outstanding politicians in a few years. At Kent, Ohio, he won the national extemporaneous speaking championship against contestants from 44 schools who had gathered for a competitive gabfest. A year ago Goldberg won fourth in the finals.

Summer-time regulations on smoking, campfires and fireworks in national forests will go into effect June 1, announce forest service officials. Smoking and fire-works will be allowed only in certain areas; campfires will be under the strictest regulation. The Angels and Cleveland National Forests in southern California have already been placed under restriction.

David Albert Lamson has again failed to achieve court vindication. On the 81st day of his second trial for the murder of his wife Allene, the jury was dismissed after being deadlocked over 95 hours. Nine jurors, including all five of the women members, were for conviction, while three men held out for acquittal.

After one of those lightning-like divorces and marriages for which Reno is so famous, Princess Barbara Hutton Mdivani, nickel and dime heiress, changed her title to countess by marrying Count Kurt von Haugwitz-Reventlow of Denmark. In a sedan with curtains discreetly drawn, the couple trekked to San Francisco after the marriage to spend the first part of their honeymoon.

Half the automobiles used in California are about six years old, according to a survey made by Director of Public Works Earl Lee Kelly. One-fourth of the cars are seven years old. The average California motorist drives 7,250 miles a year.

Colonel Henry L. Roosevelt, assistant secretary of the Navy, is in California, inspecting several naval bases before he leaves for Honolulu to participate in the critique of the far-flung fleet maneuvers.

California history lovers will flock to Carpinteria June 1 and 2 to hear the old stage-coach drivers swap yarns of "the good, old days." These dates have been set aside for the Pioneer Stage Drivers' meeting.

The Scudder-Kallam-Jones Building and Loan Rehabilitation Act has been signed by Governor Merriam, making it a law. It is the first major bill to receive the governor's signature and provides for reorganization of building and loan companies for the protection of depositors.

Poultry

CLEANLINESS BEST FOR CHICKEN YARD

Five-Point Program Outlined by an Expert.

By W. C. Monahan, Extension Poultryman, Massachusetts State College.—WNU Service.

A five-point program of cleanliness followed by successful poultrymen includes clean chicks, clean brooders, clean land, clean feeding and watering, and clean management.

Clean chicks are chicks which are free from pullorum disease and are hatched from healthy, vigorous, well-bred stock.

Brooder houses should be thoroughly cleaned and disinfected before chicks are even put in them, and they should be kept clean by frequent changes of litter on the floor.

Summer range for growing birds should be land which has not been used for this purpose for at least two years. The range should not be overcrowded with birds.

Feeding the birds from hoppers is more sanitary and also more economical than any other method of feeding. On the range, hoppers and watering places should be moved frequently, to keep any one spot from becoming contaminated.

Eliminating runty unthrifty chickens is helpful in preventing the spread of disease. Keeping chicks away from old stock also is advisable. Preventing visitors walking through the houses and over the range is another precaution taken by most men, as a means of keeping out possible infection.

New Breed of Hens Lay Eggs That Mark Chicks

Canada has contributed materially to the making of what is claimed as a new hen which has been evolved by agricultural scientists at Cambridge university, England. The bird, at the moment, is the object of considerable attention in the Old country; concerning it the Spectator says:

Few successes of greater interest and practical possibilities have been won in the field of agricultural biology than the making of the new Cambridge hen. Her chicks declare their sex at birth, because the males and the females are differently marked. This is a great advantage to the poultry industry, since chicks travel safely and well only during the first two days of their life. The new breed, known as a "Cambar," was developed at Cambridge, England, by the application of Mendelian principles. By the use of the Canadian Barred Rock, supplied by the University of British Columbia to Cambridge university, both silver and golden Cambars have been evolved. They are prolific layers of large colored eggs, whilst still possessing the virtue of sex-linked chicks. These chicks mark an epoch in the scientific breeding of poultry.

Blind Hens

Blindness may be caused by several diseases of chronic nature and by affections of the nerve structure of the eye, the nature of which is not known, says the Rural New-Yorker. It is not possible to say, from the blindness alone, what disorder is present, but it is not probable that the male bird in the flock is in any way responsible. Chronic coccidiosis may bring about lameness and blindness in mature birds. Any males or hens in the flocks that have shown evidences of blindness or other lack of health and vigor should be excluded from the breeding flock as a precaution against deterioration in that vigor that is so necessary if continued health is to be maintained in future generations.

Bronze Birds Need Greens

More vitamin A is required by the bronze variety of turkeys than by White Leghorn chickens, studies conducted at the University of California disclose. It has been shown that turkeys require an 8 per cent level of the entire ration of high quality alfalfa leaf meal to promote normal growth to 30 weeks of age and to prevent symptoms of A-vitaminosis, a vitamin A deficiency disease. White Leghorn chickens grow normally and show no symptoms of the disease on a 4 per cent level of the alfalfa meal, according to experiments made at the university.—Montreal Herald.

Ducks Grow Rapidly

Poultrymen who raise ducks have noted one thing—that they eat lots of feed and grow rapidly. Generally speaking there is profit in feeding good breeds of ducks for market so long as they are growing. Where the profit disappears is after they have reached maturity and keep on eating voraciously. To come out on the right side of the ledger with ducks it is, therefore, necessary to market them as soon as they are full grown and this points out the advisability of hatching them late if one plans to sell them on the holiday markets.

Simplicity and Smartness Here

PATTERN 9244

If you're the type who loves simplicity without severity, you'll enjoy a house frock with shoulder tucks, released into fullness at the bust, and a fascinating,, scalloped surplice and sleeve trim. A single kick pleat provides the needed skirt fullness, and you will find that the seam leading to it gives a slender appearance. The dress is beautifully proportioned and certain to fit correctly. Have you shopped for the season's silks, cottons and rayons yet? The shops are teeming with most attractive prints to inspire your new wardrobe.

Pattern 9244 may be ordered only in sizes 16, 18, 20, 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 4 yards 36-inch fabric.

SEND FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, STYLE NUMBER and SIZE.

Complete diagrammed sew chart included.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth street, New York.

THE PERFECT HUBBY

Brown—Do you know, dear, I was reading the other day that an ostrich can see very little, and can digest anything.

Mrs. Smith—What an ideal husband!—Boston Evening Transcript.

Imagination's Lavish Purse

"What would you do if you had a million dollars?" asked one Communist.

"Don't interrupt my train of thought," said the other. "I am no piker. I wouldn't bother to imagine anything less than a billion."

No Joshing Either

Teacher—Rastus, what animal is most noted for its fur?

Rastus—De skunk; de more fur you gets away from him de better it is fur you.

Demonstrations of Power

"Much shooting in Crimson Gulch?" asked the traveling man.

"Yes," answered Cactus Joe. "But it is mostly being done by the police. It begins to look like a policy of law and disorder."

Nary a Word

"Who gave the bride away?"

"Nobody said a word."—London Tit-Bits.

BRISBANE
THIS WEEK

The First One Goes
Looks Like War
Don't Stumble
400 Men, 400 Mice

The death of Marshal Pilsudski, ruling power of Poland, takes from that country a great man and an able patriot. Remaining in the background, exercising power without display, Marshal Pilsudski was an absolute dictator, and his death is first among the dictators developed by the great war.

Arthur Brisbane

The world may learn from his going what to expect when other dictators depart, one by one.

What will be the destiny of Poland, with her strongest man gone? What, at a later time, will happen in Italy, Germany, Russia, Turkey, as each loses the dictator that now takes the place of self-government and independent public thought?

Italy calls out her "fourth class" fighting reserves and has 950,000 men ready to crush the king of Ethiopia, if crushing becomes "necessary." Note Mussolini warns other countries not to meddle and not to help Ethiopia. That looks a little like war.

Warning to politicians and others. Don't stumble.

In California, Herman Zeigler was putting 18 tame lions through their paces. He cracked the whip; they obeyed, jumping up on stools, sitting up on their hind legs. "Mind over matter" was beautifully demonstrated. The lions acknowledged their master.

Then, unfortunately, the lion tamer, careless, stumbled over a stool, fell; instantly the lions were upon him, forgetting their fear of him. He had stumbled and fallen —that was enough.

There are among us today, on and off the radio, some lion tamers, making the American people sit up and jump through loops. Let them take care not to stumble.

In China a subterranean river flooded the Szechwan coal mine. Four hundred miners were drowned.

Old-fashioned Chinese used to forbid, and still abhor, any mine digging, "because it disturbs the earth dragon." They will think the old earth dragon flooded the mine, ordered the unseen river to enter.

This drowning news is less exciting to the average American than it would be to have the cook announce: "There were 400 mice drowned in the sink."

The sink is near home, China is far off.

Seventy-five fighting game cocks and 35 men were seized by state troopers in a barn 15 miles out of Hammonton, N. J. Brutality in men dies slowly, but sinks to lower levels with time.

Kings of England once sat delighted around the "cockpit," betting on their favorites, reveling in the extraordinary courage of the game birds. Now cock-fighters are driven to hiding in barns, police arrest them, magistrates fine them.

Hitler continues his program on the "If you do not like it, lump it," plan.

Washington protested feebly against Germany's discrimination in debt payments against this country. Germany tells us to take what is given and be grateful, or make trade arrangements to suit Hitler. He hopes to counteract that boycott against German goods established here.

The former kaiser, reported seriously ill, is confined to his bed, ordered to avoid all effort; a hard order for the "all highest."

How such names at Hitler, Stalin, Mussolini must grate on the nerves of the aging Hohenzollern! He can sympathize with England's Henry II, who, after defeat, turned his face to the wall, muttering, "Shame on a beaten king," and died.

Mr. Morgenthau, secretary of the treasury, assures you that your American dollar is sound, which is comforting. Mr. Morgenthau knows a good deal about money.

The British do not agree with him, and some British experts consider the dollar worth about 50 cents now and expect it to go lower.

They will probably be disappointed. John D. Rockefeller's I. O. U. is as good as gold, and this country is the John D. Rockefeller among nations.

A New England gathering approves birth control and sterilization of the hopelessly insane and habitually criminal, with full dissemination of birth control information. The action was not taken by any "radicals," or other queer fauna but "by the New England Conference of Methodist Churches." That makes it news.

Mute Monuments to U. S. Heroes in France

The Aisne-Marne American cemetery, near Belleau, France, showing general view with memorial chapel and flag poles. This cemetery is the burial place of 2,288 Americans, most of whom lost their lives in the vicinity of Belleau Wood and Chateau-Thierry in the Aisne-Marne salient during the operations of June and early July, 1918, which resulted in stopping the German advance toward Paris.

Massing of the Colors

THE annual massing of the colors service at Washington Cathedral has become an institution of the life of the Nation's Capital. For several years the patriotic organizations of the city have joined in the impressive commemoration of the heroic dead, and the beautiful southern slope of Mount St. Albans is a perfect place of assembly for the thousands who have wished to attend.

Nowhere else in the United States is there to be found a more deeply stirring spectacle than the procession of flags which is a distinguishing feature of each recurrent occasion. There are usually more than six hundred banners in line when the bugles sound the signal to advance. The bearers start from St. Alban's Parish church, at the west gate of the Cathedral Close; follow the tree-sheltered lane into the Cathedral walls and descend into the amphitheater by way of the Pilgrims' Steps—a brilliant tide of red, white and blue flowing to the music of drums and trumpets.

Scene at Massing of the Colors at Washington Cathedral.

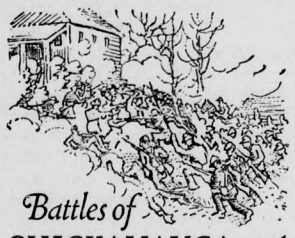
The service proper centers about a cross of poppies raised in a woodland grove which nature seems purposely to have provided.

No denominational differences mar the event, no political dissonance disturbs it. And no chauvinistic extravagance ever is permitted to intrude. Gratitude and respect, tolerance and peace are the keynotes of the rites. Invariably, the President speaks or sends his greeting, and the sermon of the bishop of Washington is an appeal to conscience of the multitude to the end that "these dead shall not have died in vain."

The service is a memorable experience of the type which, at least once in his career, every American should have, observes a writer in the Washington Star. Its pageantry, its majesty, its living grandeur and its compelling stimulation have an enduring influence in the mind and heart. It represents a nation at worship, a nation aspiring toward a common unselfish ideal, an all-inclusive love of country, God and man.

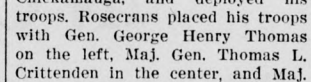
Sun Honors War Dead

A WAR memorial on which the sunlight falls only on November 11 at 11 a. m., is a feature of the Shrine of Remembrance at Melbourne, Australia. There is a device by which a shaft of sunlight lines down from the roof to strike the rough-hewn rock in the middle of the shrine exactly at 11 a. m., Melbourne time, on November 11.



Battles of CHICKAMAUGA and ATLANTA

THE battle of Chickamauga was fought September 19-20, 1863, when Gen. William Starke Rosecrans was marching on Chattanooga, with Gen. Braxton Bragg slowly retreating, and expecting reinforcements. These reinforcements came suddenly and unknown to Rosecrans, relates a writer in the Indianapolis News. Bragg halted at Chickamauga, and deployed his troops. Rosecrans placed his troops with Gen. George Henry Thomas on the left, Maj. Gen. Thomas L. Crittenden in the center, and Maj. Gen. Alexander McD. McCook on the right, along the Chickamauga creek. September 19, the Confederates crossed the creek, and Maj. Gen. Leonidas Polk struck Thomas' line. Thomas returned the assault, confusing Bragg's plan. September 20, Thomas was again attacked. He frequently called for reinforcements, though he held his position stoutly. Finally Gen. Thomas J. Wood, misinterpreting an order, made a false move, which precipitated the Confederate attack on a weak point in the Federal line, and the day was lost. Rosecrans fled to Chattanooga, but Thomas kept fighting until Jen. James Abram Garfield was sent to summon him. The combat engaged 55,000 Federals and 70,000 Confederates. The Federals lost 16,000 and the Confederates 18,000. The battle of Atlanta took place July 22, 1864, in Atlanta, between Gen. William Tecumseh Sherman's army of the Tennessee, numbering three corps, and Brig. Gen. John Bell Hood's corps of Gen. Joseph Eggleston Johnston's army. The Confederates were defeated and driven back to their intrenchments within the town. Hood began the attack on Brig. Gen. William E. Hardee on Sherman's left. Gen. James B. McPherson, of the Federals, gained a position on a high hill, commanding the heart of the town, and then the fight went on all along the line. Battery F, Second United States artillery, was lost in a sharp skirmish on a country road, and McPherson, riding to its assistance, was killed. The battle lasted more than four hours. At four o'clock Hood plunged into the remnant of McPherson's line and drove it back 400 yards, carrying two important batteries in the face of murderous fire. Gen. John M. Schofield's batteries were hurried up to maintain this desirable position and aid the Fifteenth corps to regain its lost ground, in which he was successful. Hood retreated to his intrenchments, having lost all his guns except the two advance ones. Sherman lost 3,722 men and Hood many more. Atlanta was afterward besieged by Sherman and captured, on Hood's abandoning it, September 2, 1864.

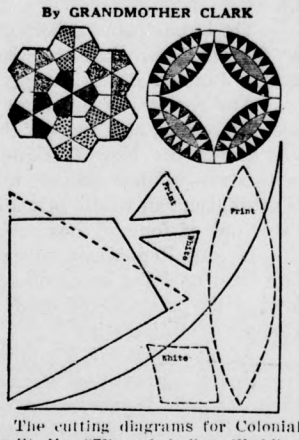


Flag of the Confederacy

THE Stars and Bars flag was the original flag of the Confederacy, with three horizontal bars, red, white and red, and a blue union, on which were seven white stars arranged in a circle. The name is also sometimes applied to the latter flag or Southern Cross, with blue St. Andrew's cross bordered with white on a red background, and having three white stars on each arm and one at the intersection. Only eleven states actually seceded.

CORRECT GUIDES TO QUILT MAKING

By GRANDMOTHER CLARK



The cutting diagrams for Colonial quilt No. 97B and Indian Wedding Ring No. 90B are offered to quilt makers who are particular to have the patches cut out right. These cutouts include the seam allowance. It is necessary to cut the patches out right if you want neat results. The Indian Wedding Ring has five different pieces to be cut out and the Colonial Garden only one. The triangle shown is sometimes used when the Colonial quilt is set together, leaving a running vine between units. The Indian Wedding Ring is identical with the Double Wedding Ring, only more patches are used to produce the effect.

Send 10 cents to our quilt department and we will mail both of these cutout sets postpaid.

Address—HOME CRAFT COMPANY, DEPARTMENT D., Nineteenth and St. Louis Avenue, St Louis, Mo.

Inclose a stamped addressed envelope for reply when writing for any information.

Virtue in Lemon

It is, indeed, the greatest contribution one can make to city and nation that one should be a good man, a good woman, reverencing truth, justice, nobility, honor, chivalry, and trying to exalt them in all that one is and does; despising everything unfair and mean, and making one's fellows see by the way one acts what a beneficient and royal thing is trade, or mechanical industry, or the interpretation of the law, or the healing or nursing of the sick, or the pursuit of knowledge or art, or the teaching of children.—John Hunter.

FOR SCIENTIFIC WAR ON LOCUST

Airplane Enlisted in Fight to Control Pest.

During the past nine years locust swarms have been devastating vast areas in Africa and western Asia, and since 1929 experts have been studying means of controlling the insects. Recently, at an international locust conference held in London, it was resolved that the locusts could be halted through the control of their breeding grounds, or, if they are already in migration, through their destruction in flight.

Agricultural development in Africa has been considerably impeded by the depredations of the locusts, which have caused losses of approximately $35,000,000. Investigations have now disclosed that each species of locust inhabits exclusively a definite zone of vegetation and that its migrations are governed by the seasons. Many of these breeding regions have now been located. The desert locust, for instance, is known to breed in the remote lands south of the Sahara and to migrate northward to the fertile Mediterranean coast of Africa.

Once the breeding areas have been found, the conference reports, the next step in control is to establish field stations where the life habits of the insects will be studied. Evidence already gathered tends to show that swarms form when the life cycles of solitary locusts are accelerated, causing a rapid multiplication of numbers.

As swarms gather preparatory to flight, if their migratory courses have been discovered as well as their breeding sources, it is then possible, recent experiments in Africa indicate, to destroy them with poison dust sprayed from airplanes. Locusts make no effort, it has been shown, to avoid a cloud of sodium arsenate dust blown across their line of flight. Nor does the passage of an airplane through or across their ranks deter them from the course.

Most of the locusts passing through the sodium arsenate eventually drop out of the swarm to their death, apparently because the inhalation of the dust brings on paralysis. The poison will remain fatal to a passing swarm for about three minutes. It must be discharged several times for large swarms and must be sprayed at a height of about 100 feet to avoid damage to crops.

ONE MORE BLOW

Spring-struck nature wasn't responsible for all the blessings that May day brought to California this year. You have to credit the state senate with one of them.

It was on that day that the solons took careful, intelligent aim, and let fly with a death blow for Governor Merriam's highway unification program. It would have taken the counties' own roads from them, and placed them under bureaucratic control at Sacramento.

The vote was 27 to nine, and killed the measure for this session, at least. Let us hope no one will be indiscreet enough to try to raise it from the well-deserved grave at some future time.

Meanwhile there remains one further death blow to be struck before the highway user can breathe easily again. That is another Merriam proposal, the one-cent boost in the gas tax, and diversion of its revenue from highway purposes.

True, it is apparently headed for the discard with the rest of the governor's "nuisance" tax schemes. But we can never be sure until it has had a complete and final squashing.

This state has an opportunity, now, to demonstrate once and for all that it is not going to stumble into such pitfalls as have caught other sections of the country in the matter of gasoline taxation.

In some places the tax has been exploited until the total revenue it yields has declined, since people decided simply to get along with less gasoline rather than pay an exhorbitant price. In several states it has mounted to 100 per cent, rendering motoring virtually a luxury, for the wealthy only.

One death blow has been struck. One more, now, and California's will be all set to use their highways in the fullest enjoyment of May so auspiciously ushered in.

WHO IS PUTTING SAND ON THE TRACK?

One of the most interesting charges to be made by Washington statesmen recently is the one which alleges that Republican leaders there are seeking to embarrass the administration by alliances with radicals. Thos who make the charge are duly indignant. Evidently they lack either memory or a sense of humor. One only has to go back in memory to the Hoover administration to recall how wholeheartedly the Democrats cooperated with the President to put through his ideas. Never was there a complaint possible. Of course the Democrats didn't flirt with radicals then. They avoided such folks as a European official shuns an American debt collector. If you believe this then you must be a firm believer in Santa Claus.

The bi-partisan support given the present administration as far outshines that accorded Mr. Hoover as a Hollywood day in June outshines a foggy November evening in London.

And charges of this kind are very unfair to the radicals, too. There may be a few off the reservation but most of them are giving the New Deal unflagging support. Some nasty critics are unkind enough to say that if an automobile in Washington ran wildly into a crowd on Pennsylvania avenue, three out of four of those injured would be "liberals."

If any Republican is caught conspiring with redicals like Senator Long he ought of course to be spanked for following the example of many minority leaders back in the Hoover administration.

After all, the NRA and the AAA may have been having trouble but a great deal of criticism seems to be coming from such staunch Democrats as Senators Byrd, Glass, Adams and Bailey, Bainbridge Colby, Jim Reed, and so on. Certainly nobody would accuse these statesmen of combining with any "wild men." In fact, the newspapers the other day quoted a trusty lieutenant of Lieutenant Donald Richberg as stating that such stalwart administration men as Senator Joe Robinson and Senator Pat Harrison are not wholeheartedly for the NRA. Things are getting all scrambled up and we don't understand 'em.

Poetry Program

(Continued from Page 1)

from a group of six a few years ago it now numbers 20, including girls from all four grades. Membership is entirely voluntary, and the girls form a happy group, whose efforts are studied and criticised, and with helpful suggestions, their improvement is quite remarkable.

Mrs. Rae read a number of the poems illustrating all types of subject matter and different viewpoints of the same theme.

Mrs. H. C. Smith read a brief account of the life and works of Edwin Arlington Robinson, whose recent death brought to a close the career of a writer honored for several years as "America's foremost living poet."

Masses of sweet peas from the gardens of Robert Scholz filled the room with beauty and fragrance. For the other lovely flowers the committee were indebted to Mrs. J. C. Ainsley and Mrs. Leigh Saunders.

The program committee, on behalf of the club, wish to publicly extend their thanks to Mrs. Jackson, Mrs. Putnam, her pupils and their mothers, Mrs. Rae, and the two accompanists who made such a delightful afternoon possible.

Mrs. C. H. Whitman introduced Mrs. Douglas Cutting, who is the incoming president of the Pacific Grove Women's Civic club, and who is here for a time at the home of her father-in-law, F. H. Cutting.

At the business meeting, Mrs. G. E. Farley announced that the picnic committee had arranged for the use of the grounds at the Odd Fellows home. The members will meet at the Community hall at 11 o'clock Monday, June 3, and transportation will be arranged. Each person will bring her own table service, and those not at the meeting Monday may arrange with Mrs. Farley as to the eatables, if possible; but if not, bring a hot dish, salad or dessert.

NEWS FOR POISON OAK SUFFERERS

Does poison oak irritate you?

Do you get all hot and bothered and break out in a rash at the mere sight of the bush Then a good strong application of laundry soap and hot water would propably help you, says Dr. Bertha Mason of the San Jose State college health department.

Also, she advises, try an application of soda. Baking soda; you mix it with water and apply it externally.

But if you would rather be intoxinated, a poison oak toxin can be bought at nearly any drug store, Dr. Mason reveals. Drink it, or take it by injection—it's good either way, she declares, and the effect will last for two or three months.

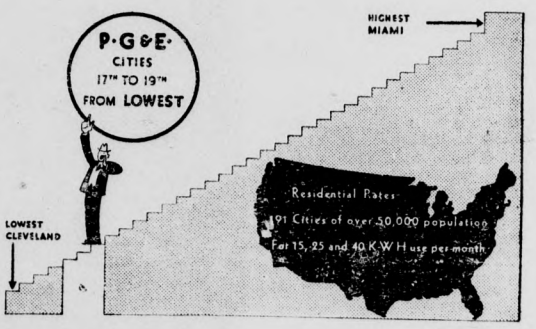
ELECTRICITY IS CHEAP IN CALIFORNIA

TWICE PROVED —by Federal Power Survey —by California Railroad Commission

1. Federal Power Survey shows . . .
residential rates in cities served by P. G. and E. rank 17th to 19th from lowest in the U. S. for monthly consumption of 15, 25 and 40 KWH in comparison of residential rates in 191 cities of over 50,000 population.



2. California Railroad Commission report shows . . .

"a comparison between the rates for electric power in California and the rest of the United States indicates that the average rate for domestic electricity in this state is 4.8 cents per kilowatt hour, while the average for the United States is 6.0 cents. Also, the average rate for agricultural power in California is 1.5 cents per kilowatt hour as compared with 2.8 cents for the entire United States."

Notice that this report deals with average California rates. P. G. and E. domestic rates are below the California average. They are 20 per cent below the national average. And P. G. and E. agricultural rates are 46 per cent below the national average.

Mrs. Horace Person Entertains for Mrs. Bessie Cook, El Paso

Mrs. Horace Person entertained a group of friends at a luncheon Tuesday honoring Mrs. Bessie Cook, who is spending several weeks here at the home of her sister, Mrs. George Jeffers. Mrs. Cook has been attending U. C. at Berkeley and after the close of the Campbell school will return to her home in El Paso, Texas, taking her niece, Elaine Jeffers, with her for the summer.

The guests were seated at the dining table, which was covered with a lace cloth. The centerpiece was of delicate shades of yellow flowers with tapers of yellow. The service of Hobnail glass was in complete harmony with the other colonial furnishings, with which the hostess has almost supplied her home.

After luncheon two tables of bridge were in play, Mrs. Douglas Cutting of Pacific Grove having high score.

• All kinds of house wiring and Electrical work.

Thirty Million Miles of Ford Economy

MORE MILES. Faster miles. Greater economy . . . that is the story of the Ford V-8. There are conclusive figures from owners to show that it is the most economical Ford car ever built.

A particularly interesting and complete report of costs comes from a national fleet owner who has owned 854 Ford cars which have run more than thirty million miles in business use.

175 were Model T Fords which were run 5,017,075 miles. 599 were Model A Ford cars which were run 24,041,632 miles. 80 are Ford V-8 cars which have been run 2,982,886 miles.

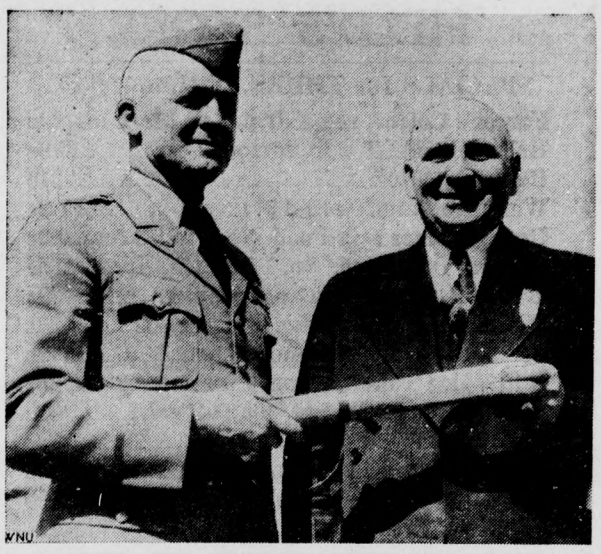
This owner's cost records show that Ford V-8 cars cost 12% less to operate than the Model A Fords and 31% less than the Model T Fords. And they covered more miles per month! The monthly average for the Model T Fords was 1509 miles. . . . For the Model A Fords, 1866 miles. . . . And 2571 miles for the Ford V-8.

Each year the Ford car gives you more in value and performance and costs you less to operate.

Actual Figures Show The Ford V-8 is 12% More economical than the Model A. and 31% More economical than the famous Model T.

FORD V-8

GOVERNMENT GETS AIR FIELD

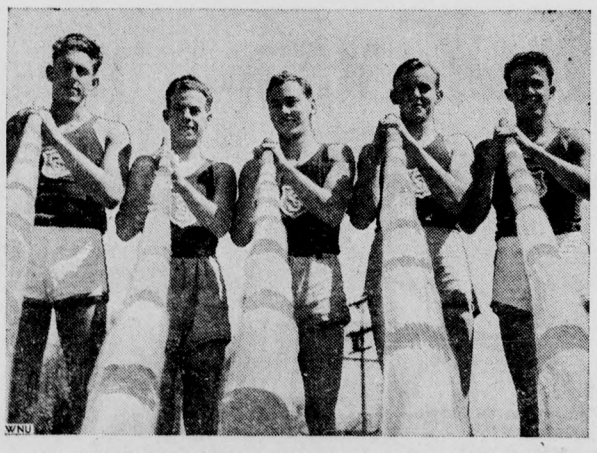


Formal dedication of Hamilton Field, the Army's fine new bombing air base at San Rafael, Marin County, was completed when Governor Merriam of California presented a final deed to the property to Brig. Gen. H. H. Arnold, commanding the First Wing of the G. H. Q. Air Force. Twelve thousand attended the ceremony.

TEAR BOMB HITS STRIKE TRUCK

Tear gas bombs and baseball bats were both used when 60 longshoremen and 200 members of the American Protective League battled at Jackson, Amador County, as the longshoremen brought in food supplies for striking Jackson miners, and jeering between the two factions led to fighting. Photo shows longshoremen as a tear gas bomb landed on their truck.

TROY'S VAULTING QUINTUPLETS



Coach Dean Cromwell well may be proud of his quintuplets, shown above, who rank among the outstanding collegiate pole-vaulters in the United States. Their vaulting marks range from 14 feet 3 inches to 13 feet 9 inches. Left to right we have Bill Sefton, Joe Ramsey, John Hooker, Jim Fimple and Earl Meadows.

Countess Barbara

Countess Barbara Haugwitz-Reventlow, recently Princess Barbara Mdivani and originally Barbara Hutton, five-and-dime store heiress, looks not one bit pleased as she glares down cameramen who caught her on her first stop in a royal honeymoon, dining in San Francisco.

CALIFORNIA'S PORTION OF U. S. FUNDS IS 22 MILLIONS

WASHINGTON — (WNU) — California is to receive $22,000,393 as its share of the $1,091,802,200 which the President's 22-man allotment board designated to various work projects throughout the United States. The money will be used for construction of highways, roads and streets and grade crossing elemination.

Pulitzer Winner

Arthur B. Waugh, associate editor of the Sacramento Bee, is the author of a series of articles about Nevada Federal judgeships that brought to his newspaper and himself the Pulitzer prize for the most meritorious service performed by an American newspaper during 1934. This is the first time a California newspaper has won the award.

C. P. Powers of Sacramento has patented a beet harvester which digs, tops and loads beets onto a truck in one continuous operation. The machine is drawn by a tractor.

STATEWIDE
Farm & Ranch News

Delegates for two agricultural conferences met at Sacramento, May 21 to May 23. The first one, meeting the 21st, was the Western Plant Quarantine Board, attended by 40 delegates from the eleven western states, Mexico, British Columbia and Hawaii. The other was the fourth annual Western Area Standardization Conference. Both groups met to make plans to unify the state laws relating to fruit and vegetable standardization and quarantine.

Wine consumption in California increased 45.2 per cent in the first quarter of 1935 as compared with the same period last year. Consumption was about 20 per cent higher throughout the United States during the same period, according to Harry Caddow, secretary, California Wine Institute.

Under the auspices of the California Wool Growers Association, the 15th annual ram sale and wool show was held at the state fair grounds, Sacramento, May 22 and 23. Sheepmen have found the affair of great value, not only in seeking pure-bred stock, but also in discussing mutual problems and gaining ideas.

Able-bodied men will be unable to obtain aid from Tulare County food depots during the summer months. Farmers in that county are having trouble obtaining cotton choppers. In view of the labor shortage, the county will not feed persons able to work.

Unpaid accounts to growers and other violations of the Agricultural Code have resulted in the California Produce Corporation, Ltd., surrendering its license to operate to C. J. Carey, market enforcement chief, state department of agriculture.

California fruit and nut crop prospects for 1935 promise a satisfactory season, according to the Federal-state crop reporting service. There will probably be few, if any, bumper crops and no excessively short crops. All crops will be later than last year.

Olive growers met recently at Sacramento for the purpose of organizing a Sacramento-Yolo branch of the Olive Growers Protective League. Other units of this statewide organization have been formed in Butte, Yuba, Tehama and Glenn counties and in the counties of the San Joaquin Valley.

Twenty-five new committeemen, made up of shippers and growers, will manage the affairs of the California Fresh Deciduous Fruit Tree Marketing Agreement. The new agreement will be effective shortly.

Hearings are being conducted in Nevada City, Nevada County, in a suit brought against the California Canning Peach Growers Association by 126 growers. The hearings deal with the appointment of a receiver.

The Whittier Mutual Orange and Lemon Association and 21 other corporations and individuals have united in filing a complaint seeking to restrain the Agricultural Prorate Commission from enforcing its program for the harvesting and marketing of lemons within the state.

According to reports of the Poultry Producers of Central California, the egg market is improving. Many cities in California have been found to be short of eggs as compared with a year ago.

California State Grange members from six counties adjacent to Sacramento met recently to perfect organization and make plans for handling the annual conventions of the state and national Grange which will be held at the state capital in November.

Restrictions on the utilization of wheat planted in the fall of 1934 or the spring of 1935 on all farms covered by the 1934-35 cotton acreage reduction contracts, are rescinded, according to a bulletin issued by N. D. Hudson, assistant Farm Advisor of Kern County. Midwest drought conditions are said to be responsible for the order.

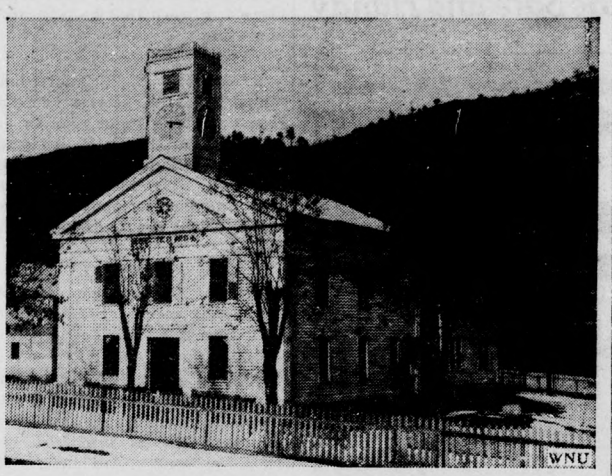
In 1934 California hens laid eggs valued at $28,801,000, which figure is about $1,000,000 more than the total value of the runner-up, Iowa.

At a special meeting, the Virden Packing Company stockholders approved the sale of the Sacramento and South San Francisco plants to Armour and Company.

Distribution of about $425,000 to more than 10,000 walnut growers and packers as partial return on the 1934-35 surplus pool and license has been announced by the Los Angeles office of the Federal Walnut Control Board.

California pasture and range conditions at May 1, according to the crop-reporting service, were placed at 101 per cent of normal as compared with 75 per cent last year and 80.1 per cent for the last ten-year average.

ANOTHER COUNTY HEARD FROM



MARIPOSA COUNTY COURTHOUSE

Although ranking 54th among California's 58 counties in population, Mariposa has the reputation of being host to more people than any other county in the state. This is because of the artistry of nature, who, many centuries ago and with glaciers as tools, turned sculptor and carved one of the grandest valleys in the world, high in the rugged Sierra. The valley is called the Yosemite.

Nature was in an inspired mood when she chiseled 3000-foot vertical walls of stone and led white-foamed rivers over the edges of cliffs to drop in half-mile cascades. In the same park is a forest of Mariposa big trees, many of them topping 300 feet. Like huge watchtowers, guarding the natural masterpiece, Sierra peaks rise almost two miles above the valley floor.

Historically, Mariposa is known as the "Mother of Counties," since its boundaries once covered one-seventh of the area of the state. Its courthouse, shown above, is the oldest in California still in use. It is furnished with the same handmade furniture to be found in the building on its opening day in 1854. A journey to the county seat of Mariposa is like reversing time 75 years. Ranchers still cross the threshold of the old Fremont store to buy their groceries.

The county is located 100 miles east of San Francisco in the southern Mother Lode section. Its topography is varied, extending from valleys to Sierra peaks. In the '49er days it was a rich mining district. More than $7,000,000 in gold has been extracted from the Mariposa Mine alone. Today mining is being revived; there are many prospectors in the county, seeking another strike.

Cattle and hog raising and grain and hay farming are the chief agricultural activities of the region. Mariposa is negotiating for irrigation projects, which will make its valleys parallel the San Joaquin in productivity.

Sports

As far as Europe is concerned, Livermore's Max Baer is no longer the world's heavyweight king. Because of his failure to meet the outstanding challenger, Pierre Charles, the International Boxing Federation has "dethroned" the California killer. Baer is just another heavyweight as far as the august international body is concerned.

Far be it, however, for any boxing federation, European or otherwise, to put anything over on Max. He now proposes to take Brother Buddy Baer to Europe this summer to meet Pierre Charles for the European World's Heavyweight Championship. Baer has calculated, and not without considerable justification, that after a minute or so of glove-fencing, Monsieur Charles will feel a sudden need for rest and quiet and will proceed to indulge in these privileges upon the floor of the ring.

Then Mamma Baer will have two world's championships in her family, says the bugBaer of heavyweight crown aspirants.

When it comes to jumping, both broad and high, Olson, Marty and Johnson have nothing on that agile group of competitors, bullfrogs. Adopting the idea from Calaveras County, wherein is bred and reared the greatest fleet of hoppers in the world. New York has gone in for frog-jumping contests in a big way. In fact, 200 giant Louisiana broad-jumpers were imported there for the Mark Twain Centennial celebration.

The athletes jumped so high, so far and crow-hopped so successfully that New Yorkers were emboldened to challenge the California champions. Trainers and managers here pooh-pooh the idea, saying that it will take several generations of eastern champions, working out daily, before any worthy competitors of the Calaveras County breed can be evolved.

Tradition and a high standard of competition would make eastern jumpers lose before their first leap, western experts assert. In other words, frog-breeders outside the state have been warned to look before they leap.

News Oddities

Meridian (Sutter County) — A thoroughbred colt was found with his head wedged in the crotch of a tree, his front legs off the ground. After trying to free the animal in every possible way, it was finally necessary to cut down the tree to release him.

Los Angeles—Love laughs at age. W. T. Miller and Dorothy Jewett obtained a marriage license, he registering as 70 years old, she as 20. No sooner had they left the license bureau than Walter De Lorraine and Mrs. Annie Carter took out a license. She was 61 and De Lorraine 40.

El Centro—While walking down the street, Mihran Simonian met Frank William, whom he hadn't seen for 13 years. Simonian fumbled in his pocket producing a $30 check given him by William the last time they had seen each other. The check had bounced back. Simonian demanded payment and got his money.

Redding — Three small kittens here have been sacrificed to the overpowering maternal love of a setting hen. Attempts had been made to break her of the habit by depriving her of anything on which to set. As a last resort she gathered three kittens under her wing. Later, when the animals were found, they had been smothered.

San Francisco—Can the accident case of Harry O'Hara be classed as hit-run? After being knocked down by a car, O'Hara was loaded into the machine and taken to several drinking places, the driver buying him drinks at every stop. Finally the driver took him to the Hall of Justice to report the accident. After registering a complaint, O'Hara emerged to find the car had vanished.

Men Who Have Made California

STEPHEN TYNG MATHER

Mather is a man whose hobby brought him nationwide fame. Unlike most business men who sought relaxation at clubs and on golf courses, Mather's spare time was spent in intensive study—of national parks. These investigations won him a position under Franklin K. Lane, Secretary of the Interior. It was in this capacity that Mather was able to immortalize himself as organizer of the National Park Service in 1917, whose director he has been ever since.

Stephen Tyng Mather was born on the Fourth of July, 1867, in San Francisco. He was a descendant of Cotton and Increase Mather, iron Puritan rulers of an old New England dynasty.

After graduating from the University of California, he took a job on the staff of the New York Sun where he worked six years. Then he entered his father's business, the Pacific Coast Borax Company. His father was New York manager of the company.

During his many years with this organization, Mather studied the park situation in the United States. Eventually he knew as much about the parks as anybody in the country.

Secretary Lane made an apt choice in picking him as his assistant. Up until 1917 the national parks had been but loosely coordinated and organized. Many of them had been inaccessible and few of them had proper facilities for visitors.

As director of the National Park Service Mather, "The Welder of Parks," made it possible for thousands to visit the great natural playgrounds of the nation. California, which has more than its share of parks, has benefitted immeasurably by his directorship. An example of his efforts is the Tioga Road from Tahoe.

MOSES KNEW

The demand for rest on the Sabbath goes back to the days of Moses, who was the greatest medical officer of health and sanitary inspector that ever lived. He realized that mankind could not work continuously seven days a week. I agree with that, and that is why I have always been afraid of any serious derogation from the observation of the Lord's day. I know that once you get a serious breach in this respect we may all have to work seven days a week. I certainly do not believe in that doctrine. I would like to have a whole day of recreation also on the day previous to the Lord's day.—F. A. Macquisten, K. C.

Expect Much of

THE PALACE HOTEL

San Francisco

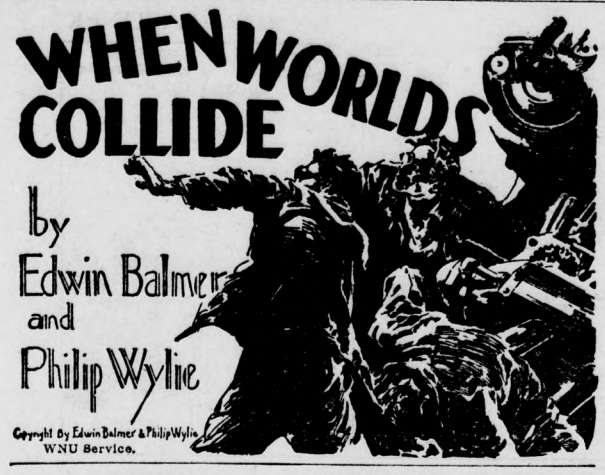
Expect much of San Francisco's famed Palace Hotel—for you will receive much. Expect large, modern, comfortable guestrooms, for example. The Palace covers a city block of two acres, yet it has only 600 rooms, all of them large, all with bath. Expect, too, courteous forethought for your needs; fine food in distinguished restaurants; beautiful surroundings; and shops, theatres, financial and commercial districts close at hand.

From $3 per day (single) up.

The Palace Hotel

SAN FRANCISCO

Archibald H. Price, Manager



CHAPTER X
—18—

"DO YOU know that the list of who goes in which ship has just been posted?" Jack Taylor asked Tony.

"Huh."

"I thought that would get a rise out of you. Don't worry, don't worry. You're in the first ship, with Eve, all right. Hendron's in command. You're a lieutenant. James is with you. But guess who's in command of the second ship."

"Jessup?"

"Guess again."

"Kane?"

"Nope; you're all wet. Those two noble scientists are second in command. The big ship is going out under the instructions of your good friend David Ransdell."

"That's grand," Tony said; "but will he have sufficient technical knowledge to run the thing?"

"Oh, Jessup and Kane will do that all right. Ransdell's only going to be a figurehead until they get to Bronson Beta."

"That's swell."

Tony kicked the lock on his suitcase shut, and said, "We've got to get packed up. You know we're going places tomorrow."

Jack sat down on the bed. "That reminds me; I'm going on the second ship, too.'

Tony's face fell. They were serious again.

Jack said: "When you are all set, they want you down at the Ark. Everybody's going through it, and getting assigned to their quarters."

Tony walked up a long flight of steps to the airlock. As he went he cast an upward glance at the elaborate structure of beams which supported the Ark, and which workmen were now removing. The interior of the Ark was brilliantly lighted by electricity. Through its center ran a spiral staircase, and a long taut cable inside the stairs. At eight-foot intervals steel floors cut the cylinder into sections. The two forward sections were crammed with machinery and instruments, and across them ran the great thrust-beams against which the atomic tubes would exert their force. A ring of smaller tubes pointing outward around the upper and lower sections like spokes were provided to give free dimensional control of the ship, and to make the adjustments necessary for grounding. It had been planned to travel head-on for the greater part of the distance. When the reaction forces were started the whole ship would be upside down for some time, and eventually the landing would be made after turning it end for end; and although the probabilities of depositing the ship precisely upon her stern, and of keeping her in that position, were small, it was felt that after she had landed she might tip over—a motion that would be broken by the use of the horizontal jets—or that she might even roll, which could also be stopped by the jets, as had been done on the short and simple hop from the ground on the night of the attack.

Tony walked up the spiral staircase from the stern's engine-room. Above it were stock rooms with their arrangement for lashing fast the live stock. Above the stock rooms were store rooms reaching to the center of the ship, and tightly packed. In the center of the ship were the human quarters, their walls carefully padded, and lashings, similar to but more comfortable than those provided for the animals, arranged along the floor.

On the side walls were water taps, and in steel closets food for a considerably longer time than four days had been stored; but in their journey through space the travelers would enjoy no comfortable beds, eat no hot meals and divert themselves with no entertainments. The exact conditions of flight through space were unknown; and underneath the springs and paddings which lined the passengers' quarters was apparatus both for refrigeration and for heating. Tony found Hendron, who was testing some of the apparatus.

"You see for me?" Tony asked.

"No. Oh, I see what it was. They were giving out the numbers of your slings down below. I've asked every one to get in slings before we start and when we land, as I'm not sure, from the single test, exactly what the general effect will be."

As Tony was about to go, Hendron recalled him. "I never showed you my engines, did I?"

"No," Tony said.

Hendron waved his arm around the chamber. It looked very much like the interior of a submarine. "This is the forward power cabin," he began. "The breeches of the main tubes are concealed behind a wall which is reinforced by the thrust-beams. Those are the ones which are to break the force of our fall; but you see here the breeches of the smaller surrounding tubes. They are not unlike cannon, and they work on the same principle. Acting at right angles to our line of flight they can turn the ship and revolve it end for end, in fact, like a thrown fire-cracker, if we should turn on jets on opposite sides and opposite ends. The breech of each of these little tubes,"— at that point Hendron turned a wheel with a handle on it, and the rear of one of the tubes slowly opened—"is provided with the tubes which generate the rays that split atoms of beryllium into their protons and nuclei. The force engendered in the process, which is like a molecular explosion, but vastly greater, together with the disrupted matter, is then discharged through the gun, the barrel of which is lined with Ransdell's metal. The consumption of fuel, so to speak, both in quantity and rate, is regulated by a mechanism on the breech itself. The rate and volume of the discharge will be, of course, immensely greater for leaving the earth than it was on the mere hop from the ground on the night of the assault. The ship proved itself then to be a gun, or rather a number of guns, which will fire steadily on the trip through space. By Newton's law, which Einstein has modified only in microscopic effects, for every action there is an equal and positive reaction, so that through space the speed and energy of the discharge from the tubes—which we also call the engines and motors, rather inaccurately—are what will determine the speed and motion of the ship."

Tony looked at the breech of the tube and nodded.

"Journeying through space we will be a rocket that can be fired from both ends and from all around the sides of both ends?"

"Exactly, although the side firing is of lesser intensity. It is very beautiful, our ship; and according to the laws of physics, by the release of more power, it will navigate space as surely as it hopped from the ground, when we required it to. We'll leave this world, Tony; and, I believe, we'll land upon Bronson Beta."

Tony stared at him: "And we'll live afterward?"

"Why not?" Hendron returned again. "We can count upon vegetation on Bronson Beta, almost surely. No, surely, I should say. Higher forms of life must have been annihilated by the cold; but the spores of vegetation could survive.

"We know too little about the lower temperatures; but what we have discovered indicates that the germinating power of micro-organisms and spores should be preserved at lower temperatures for much longer periods than at our ordinary temperatures."

"At least!" Tony caught up his words. "You will not deny, then, that there may be a possibility of higher life surviving or capable of being revived—too?"

Hendron shook his head. "I have seen too many incredible things occur, Tony," he replied, "to deny any possibility—particularly under conditions of which no one on this world has had any experience. But I do not expect it. I do expect vegetation that grows from spores.

"In the early days on this world, the great majority of plants did not reproduce by seeds, but by the far more resistant spores, which have survived as the method of reproduction of many varieties. So we will count upon a native flora which, undoubtedly, will appear very strange to us. Of course, as you know, we are taking across with us our own seeds and our own spores."

"I know," said Tony, "and even our own insects, too."

"Exactly. You've been talking with Keppler, I see. I put that problem entirely up to Keppler.

"Our first and most necessary unit of self-preservation proved to be the common honey-bee, to secure pollination of flowering plants, trees and so on. Keppler says that of some twenty thousand nectar insects, this one species pollinates more than all the rest put together. There are a few plants—Keppler tells me—such as red clover, which he cannot work on; but his cousin the bumblebee, with his longer proboscis, could attend to them. So, first and foremost among living things, we bring bees.

"We also take ants," Hendron went on, "especially the common little brown variety, to ventilate, drain and work the soil; and, as you have observed, Tony, angleworms also.

"Since we are going to take with us fish eggs to hatch into fish over there, we have to take mayflies. Their larvae, in addition to providing food for the fish, are necessary to keep the inland waters from becoming choked with algae and the lower water plants.

"And we must take one of the reputed scourges of the earth."

"What?" asked Tony.

"The grasshopper—the locust. Such an insect will be vitally necessary to keep the greenery from choking out our new earth; and the one best suited for this job is, paradoxically enough, one of mankind's oldest scourges, the grasshopper. He is an omnivorous feeder and would keep the greenery in check—after he got his start. Our first problem may be that he will not multiply fast enough; and then that he will multiply too fast. So to keep him in check, and also the butterfly and the moth, we will take parasite flies. We will have to have these—two or three of the dozen common Trachinidae have been chosen.

"We are bringing along vials of mushroom and other fungi spores. Otherwise vegetation would fall down, never disintegrate, and pile up till everything was choked. A vial the size of your thumb holds several billion spores of assorted fungi—in case the spores of the fungi of Bronson Beta have not survived. They are absolutely essential.

"Also, we are taking bottles of stagnant pond water and another of seawater containing our micro-organisms such as diatoms, plankton, uncellular plants and animals which form the basis of our own biotic economy and would supplement, or replace, such life on the other globe.

"About animals—" Hendron halted.

"Yes, about animals," Tony urged.

"There is, naturally, still discussion. Our space is so limited, and there is most tremendous competition. Birds offer a somewhat simpler problem.

"The matter of dogs and cats is the most difficult," Hendron said, closing the subject. Air pumps murmured somewhere within the ship, which seemed half-alive. Electric generators hummed, and from somewhere came the high note of one of the electronic engines. Tony left Hendron and went from the ship.

That night the emigrants from the earth gathered again in the dining hall. Hendron addressed them, outlining the general final preparations, which were augmented by specific, printed instructions to meet such contingencies as could be foreseen.

After the meeting the crowd moved outdoors and stood awhile, looking at the Bronson Bodies. The spectacle was one of weird beauty, and one calculated to strike terror in the bravest.

Already the desolate and wounded surface of man's world was stirring to their approach. Slight earthquake shocks were felt from time to time, and the very winds seemed to be moving in a consciousness of the awful cataclysm that was drawing near. All over the world, the tides—unnaturally absent since the shattering of the moon—rose again and licked up the sides of the fresh, raw shores; the people who huddled on mountains and prairie plateaus that night knew instinctively that this was indeed the end.

Tony sought out Eve. "Come walk with me," he said.

"I'd like to. It's so strange to wait, with everything done that matters. For it's all done, Tony; everything that we're to take with us has been prepared and put in place."

Tony was excited and on edge, with nerves which he tried to quiet and could not.

"Do you suppose," he said, "there'll be other ships starting from this side of the world tomorrow night and from the other side, the evening after?"

"Father doesn't know. When the radios were working well, months ago, he broadcast the knowledge of David's metal. It must have become obtainable from volcanic eruptions in other places. But we've no real news of anyone else ready to start. One thing is certain. No party can count upon the arrival of any other. Each crew has to assume that it may be the only one that gets across to Bronson Beta."

"And d—n lucky if it lands, too," agreed Tony.

"The English, Father thinks, surely have preserved enough organization to build and equip one ship, and the French, the Germans and Italians ought to do the same. Then there are the Russians and the Japanese at least with the potential ability to do it. There's a chance in Australia and another in South Africa—Lord Rhondin would head any party there, Father thinks."

"Anyone else?"

"A possibility in Argentina, and China."

"That makes twelve, counting our two."

"Possibilities, that's all. Of course, we know nothing about them. Father guesses that if twelve are trying, perhaps five may get ships out into space."

"What five?" demanded Tony.

"He did not name them."

"Five into space beyond the attraction of the world."

"The world won't be left then, Tony," Eve reminded him.

"Right. Funny how one keeps forgetting that, isn't it? So there'll be no place for them to drop back to, if they miss Bronson Beta. They just stay—out there in space—in their rocket until—"

They were off by themselves now, and Tony drew her nearer to him. She neither encouraged nor resisted him. He tightened his arm about her, and felt her softness and warmth against him. For a moment more she remained motionless, neutral; then suddenly her hands were on his arms, clasping him, clinging to him. Her body became tense, thrilling, and as he bent, her lips burned on his.

She drew back a little, and at last he let her. In silence he kissed her again; then her lips, close to his said: "Farewell to earth, Tony!"

"Yes," he said, quivering. "Yes; I suppose this is our last sure night."

"No; we leave tonight, Tony."

"Tonight? I thought it was tomorrow."

"No. Father feared the last night—if anyone knew it in advance. So he said tomorrow; but all his calculations make it tonight."

"How soon, Eve?"

"In an hour, dear. You'll hear the bugles. He deceived even you."

"And Dave?" asked Tony jealously. Dave Ransdell now was his great friend. Dave was to be in command, except as to scientific matters, of the party in the second ship; Tony was himself second only to Hendron on the first ship; and Tony had no jealousy of Dave for that. Moreover, Eve was to travel in the ship with her father and Tony; if he was saved, so would she be! And Dave might, without them, be lost. Tony had told himself that he had conquered his jealousy of Dave; but here it still held him.

"No," said Eve. "Father told Dave tomorrow, too. But we leave the earth tonight."

"So tomorrow," said Tony, "tomorrow we may be 'ourselves, with yesterday's seven thousand years.'" He held her again as he thought of his hour—the last hour of which he could be sure.

"Come away," he said. "Come farther away from—"

"From what, Tony?"

"From everybody else." And he drew her on. He led her, indeed, toward the edge of the encampment, where the wires that protected it knitted a barrier. And there, holding her, he heard and she heard a child crying.

There were no children in the encampment. There never had been. No one with little children had been chosen. But here was a child.

Eve called to the child, and it ceased crying; so Eve had to call again for a response that would guide her to it in the dark.

There were two children, together and alone. They were three and four years old, it appeared. They knew their names—Dan and Dorothy. They called for "Papa." Papa, it appeared, had brought them there in the dark and gone away. Papa told them to stay there, and somebody would come.

Eve had her arms between the wires, and the children clung to her hands while they talked. Now Tony lifted them over the wires; and Eve took them in her arms. The little girl asked if she was "Mamma." Mamma, it appeared, had gone away a long time ago.

"Months ago only," Eve interpreted for Tony, "or they wouldn't remember her."

"Yes. Probably in the destruction of the First Passage," Tony said; and they both understood that the mother must be dead.

"He brought them here to us," Eve said; and Tony understood that, too. It was plain enough: Some father, who had heard of the camp and the Space Ships, had brought his children here and left them—going away, asking nothing for himself.

Clear and loud in the night a bugle blew; and Tony and Eve both started.

"Gabriel's horn," muttered Tony. "The last trump!"

(TO BE CONTINUED.)

SYNOPSIS OF PRECEDING CHAPTERS

David Ransdell arrives at New York from South Africa, with photographic plates for Dr. Cole Hendron. Tony Drake calls at the Hendrons' apartment. Eve Hendron, with whom Tony is in love, introduces Tony to Ransdell. Professor Bronson, eminent astronomer, has discovered two planets that have been brought under the attraction of our sun. The result of the inevitable collision must be the end of the earth. The approaching bodies are referred to as Bronson Alpha and Bronson Beta. Hendron plans a "Space Ship" on which he hopes to make a landing on Bronson Beta, but has not been able to find a metal which will withstand the heat and pressure of atomic energy to be used in propelling the Space Ship. Tidal waves and quakes change the entire surface of the earth. The Hendron colony suffers, but survives. Hendron's camp is attacked by a hunger-crazed horde, and half of the personnel is killed. Hendron calls the survivors into the ship and sends it aloft. The thousands in the attacking horde are wiped out by the searing blast emitted by the ship. Hendron announces the building of a second and larger Space Ship so all may escape to Bronson Beta.

Diseases Carried by Flies

About thirty diseases are known to be carried by flies.

HOMES IN NORTH CONSTRUCTED OF STEEL AND CORK

Two portable dwellings of steel frames and corkboard walls and roofs went to Alaska to replace homes destroyed in the Nome fire a few months ago, says Popular Mechanics Magazine. The experiment has shown that this type of construction, in which the insulation is the structure instead of an addition to the structure, is admirably suited to cold regions in particular.

The material for the homes was cut to size at the factory, the parts were numbered and the houses were sent by boat to Nome where, despite adverse weather conditions, the dwellings were erected in ten days.

It is estimated the cost of such construction is about one-fourth more than for ordinary frame structures, but to offset this, a saving of fifteen per cent, or more in fuel is claimed.

In addition to complete insulation the cork and steel homes are fire resistant, vermin proof, immune to dry rot and impervious to moisture. The houses can be knocked down, moved and reassembled easily if the steel frames a bolted to timbers as a base. The corkboard is squeeze-fitted between the steel angles and secured with wire.

Lumber is used over the corkboard roof and on this is laid composite roll roofing. Each Alaskan home is eighteen by thirty feet, sufficient for four small rooms, and each structure required two and one-half tons of steel and 5,500 feet, board measure, of corkboard.

This type of construction permits optional finish, inside and outside, with stucco, brick veneer, sheet iron or stone as outside choices, and plaster, veneer panels or other finish for the interior. Provision is made easily for inside plumbing and wiring.

Standard specifications call for steel doors and window sashes with provision for storm windows. Floors are of wood.

Egypt's Ten Plagues

The popular notion is that Egypt suffered seven plagues, when in reality the country suffered ten. They were the turning of the Nile into blood, covering the land with frogs, turning the dust into lice, sending swarms of flies, killing of the cattle by a murrain, afflicting the Egyptians with boils, raining fire and hail, covering the land with locusts, covering the land with a thick darkness for three days, and the destruction of the first born of man and beast.

Russian "Justice"

Sherwood Eddy, who has visited Russia six times under the existing government, says that no profession is made in that country of settling disputes upon a basis of absolute or of abstract justice. If the offender is a poor worker he is given a light sentence, if he is an intelligent or privileged citizen who should have known better, he is given a heavier punishment, but if he is a member of the Communist party he is given the maximum penalty of the law.

WATCH YOUR KIDNEYS!

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering impurities from the blood stream. But kidneys get functionally disturbed—lag in their work—fail to remove the poisonous body wastes.

Then you may suffer nagging backache, attacks of dizziness, burning, scanty or too frequent urination, getting up at night, swollen feet and ankles, rheumatic pains; feel "all worn out."

Don't delay! For the quicker you get rid of these poisons, the better your chances of good health.

Use *Doan's Pills*. *Doan's* are for the kidneys only. They tend to promote normal functioning of the kidneys; should help them pass off the irritating poisons. *Doan's* are recommended by users the country over. Get them from any druggist.

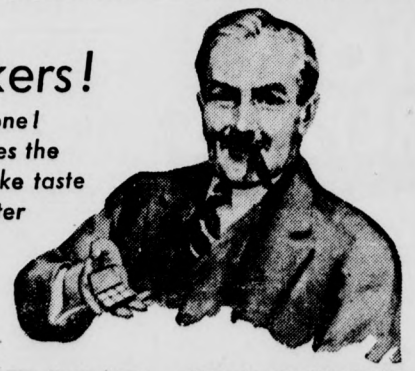
Smokers!
Try one! It makes the next smoke taste better



CONSTANT SMOKER

Most men that smoke a lot have what we call "fuzzy tongues" and don't know it! Smoking stops the flow of saliva in the mouth and you get too much acid in your system. Makes you feel sluggish and loggy. The best way to lick the acids and still keep smoking is by taking Milnesia wafers twice a day. Your mouth will always feel clean and fresh and you always have your usual pep.

Guilty of these Every Day Habits?
Eat Too Much
Smoke Too Much
No Exercise
Late Hours

MILNESIA Wafers neutralize the excess acids that cause indigestion, heartburn and sick headaches. Each Wafer is a full adult dose. Pleasant to take. Recommended by thousands of physicians—*At All Good Druggists.*

Economical, too! *Each Milnesia package contains more Magnesium Hydroxide than all other liquid forms.*

LEGAL NOTICES

NOTICE OF ELECTION

NOTICE IS HEREBY GIVEN that, pursuant to petition and proceedings according to law, an election will be held on Friday, the 14th day of June, 1935, within that certain territory adjacent to the City of Willow Glen, and within the County of Santa Clara, state of California, and described as follows:

BEGINNING at the point of intersection of the Westerly line of Lincoln Avenue with the Southerly boundary line of the said City of Willow Glen, running thence Southerly along the Westerly line of Lincoln Avenue to the intersection of said Westerly line of Lincoln Avenue with the Northerly line of Curtner Avenue, thence Westerly along said Northerly line of Curtner Avenue to the point of intersection of said line with the Easterly line of Radio Avenue, thence Northerly along the Easterly line of Radio Avenue to the point of intersection thereof with the Southerly boundary line of said City of Willow Glen, thence Easterly along the said Southerly boundary line of the said City of Willow Glen to the point of beginning,

which said territory is known as "Lincoln Glen Addition," for the purpose of determining whether said territory shall be annexed to, incorporated in, and made a part of said City of Willow Glen.

The whole of said territory is designated as one precinct with the polling place in the Lincoln Glen School, South Lincoln Avenue.

The polls will be open from six o'clock A. M. until seven o'clock P. M. of said day.

The election board to conduct said election is as follows:

Inspector: Violet D. Hyne.
Judges: Emma L. Heagarty; Rose E. Huber.

At said election the electors residing in said territory shall vote "Yes" or "No" upon the question "Shall the Lincoln Glen Addition be annexed to the City of Willow Glen."

DANA THOMAS,
City Clerk of Willow Glen
(May 16-23-30; June 6-'35)

THE SAYINGS OF SUNDAR BY A MODERN

When thy wife withholdest from thee the kisses of affection, and suggesteth that thou art no longer the sheik she once thought thee; lay it not too much at heart, for she hath moods even as thyself, and this is one of them.

Compliment her. Bring her that which is sweet to the taste, and flowers which speak of love. And if thy shekels permit, take her where life is depicted and there is music and color. Let thine hand seek her own, and fail not to press a kiss upon her fingers. Look pityingly upon others and proudly upon her, and thou shalt find her ready to cuddle close, and thy coffee shalt be hot and thy cakes golden.

Forget not that she showeth condescension to live with thee. Remember thine own words, how thou toldest her she was fairest among women; more beautiful than the lovely Helen, more charming than Cleopatra.

Cherish her and she will cherish thee. Show kindness and she will return it many fold. And when thou so givest her the key to thine heart, fail not also to hand over the key to thine chest, for verily money hath influence, nor will words suffice without it.

Moving Exhibit Machinery

As soon as the concrete floor in the Ford Exposition Building at the California Pacific International Exposition, San Diego, became fixed, the machinery for the great exhibit began to pour in from the waiting cars. Here is seen the first, a National hot header, used in "upsetting" hot steel bars approximately three-quarters of an inch in diameter. These bars are formed into drag links on the finished Ford automobile.

About a score of Campbell Kiwanians journeyed to Mt. View Monday evening to enjoy an inter-club meeting and "all Kiwanis" hour with that group. The program consisted of listening to the broadcast speeches from International which is in session this week at San Antonio, Texas.
